SPECIAL ISSUE

Root Dynamics and Global Change: An Ecosystem Perspective

A collection of reviews and research papers

Editorial 1

Root dynamics and global change: seeking an ecosystem perspective
R. J. Norby and R. B. Jackson 3

Global patterns of root turnover for terrestrial ecosystems
R. A. Gill and R. B. Jackson 13

Building roots in a changing environment: implications for root longevity
D. M. Eissenstat, C. E. Wells, R. D. Yanai and J. L. Whitbeck 33

The control of carbon acquisition by roots
J. F. Farrar and D. L. Jones 43

Spatial and temporal deployment of crop roots in CO_2-enriched environments
S. G. Pritchard and H. H. Rogers 55

Dynamics of root systems in native grasslands: effects of elevated atmospheric CO_2
J. A. Arnone III, J. G. Zaller, E. M. Spehn, P. A. Niklaus, C. E. Wells and C. Körner 73

Elevated CO_2 and conifer roots: effects on growth, life span and turnover
D. T. Tingey, D. L. Phillips and M. G. Johnson 87

Responses of tree fine roots to temperature
K. S. Pregitzer, J. S. King, A. J. Burton and S. E. Brown 105

Effects of altered water regimes on forest root systems
J. D. Joslin, M. H. Wolfe and P. J. Hanson 117

The potential effects of nitrogen deposition on fine-root production in forest ecosystems
K. J. Nadelhoffer 131

Response of root respiration to changes in temperature and its relevance to global warming
O. K. Atkin, E. J. Edwards and B. R. Loveys 141

Kinetics of nutrient uptake by roots: responses to global change
H. BassiriRad 155

Assessing root death and root system dynamics in a study of grape canopy pruning
L. H. Comas, D. M. Eissenstat and A. N. Lakso 171

The impact of elevated CO_2 and global climate change on arbuscular mycorrhizas: a mycocentric approach
A. H. Fitter, A. Heinemeyer and P. L. Staddon 179

Mycorrhizal fungi have a potential role in soil carbon storage under elevated CO_2 and nitrogen deposition
K. K. Treseder and M. F. Allen 189

Elevated atmospheric CO_2, fine roots and the response of soil microorganisms: a review and hypothesis
D. R. Zak, K. S. Pregitzer, J. S. King and W. E. Holmes 201

The representation of root processes in models addressing the responses of vegetation to global change
F. I. Woodward and C. P. Osborne 223

AUGUST 2000 VOLUME 147 NUMBER 2

Contents

FORUM

Commentary

Functional complementarity in the arbuscular mycorrhizal symbiosis • A new dawn – the ecological genetics of mycorrhizal fungi 233

REVIEW

Tansley Reviews Nos. 113 and 114

Mechanisms of caesium uptake by plants
P. J. White and M. R. Broadley 241

Ecological hazards of oceanic environments
R. M. M. Crawford 257

Books

Fractionation of natural extracts 283

RESEARCH

Nitrogen fixation by Baltic cyanobacteria is adapted to the prevailing photon flux density
A. M. Evans, J. R. Gallon, A. Jones, M. Staal, L. J. Stal, M. Villbrandt and T. J. Walton 285

The trans-tissue pathway and chemical fate of ^{14}C photoassimilate in carrot taproot
A. V. Korolev, A. Deri Tomos and J. F. Farrar 299

Assimilation and metabolism of formaldehyde by leaves appear unlikely to be of value for indoor air purification
H. Schmitz, U. Hilgers and M. Weidner 307

Traffic exposure increases natural ^{15}N and heavy metal concentrations in mosses
J. Pearson, D. M. Wells, K. J. Seller, A. Bennett, A. Soares, J. Woodall and M. J. Ingrouille 317

Plant–plant interactions and soil moisture might be important in determining ozone impacts on grasslands
S. Nussbaum, P. Bungener, M. Geissmann and J. Fuhrer 327

Nitrogen and phosphorus availability limit N_2 fixation in bean
E. O. Leidi and D. N. Rodríguez-Navarro 337

Persistence of the gelatinous layer within altered tension-wood fibres of beech degraded by *Ustulina deusta*
S. Baum, F. W. M. R. Schwarze and S. Fink 347

Spatial differences in acquisition of soil phosphate between two arbuscular mycorrhizal fungi in symbiosis with *Medicago truncatula*
F. A. Smith, I. Jakobsen and S. E. Smith ■ Commentary p. 233 ■ 357

Genetic variation and heavy metal tolerance in the ectomycorrhizal basidiomycete *Suillus luteus*
J. V. Colpaert, P. Vandenkoornhuyse, K. Adriaensen and J. Vangronsveld ■ Commentary p. 236 ■ 367

Matsutake – morphological evidence of ectomycorrhiza formation between *Tricholoma matsutake* and host roots in a pure *Pinus densiflora* forest stand
W. M. Gill, A. Guerin-Laguette, F. Lapeyrie and K. Suzuki 381

Comparative anatomy of ectomycorrhizas synthesized on Douglas fir by *Rhizopogon* spp. and the hypogeous relative *Truncocolumella citrina*
H. B. Massicotte, L. H. Melville, R. L. Peterson and R. Molina 389

Does proximity to conspecific adults influence the establishment of ectomycorrhizal trees in rain forest?
D. M. Newbery, I. J. Alexander and J. A. Rother 401

Erratum 411

SEPTEMBER 2000 VOLUME 147 NUMBER 3

Contents

FORUM

Commentary

The ups and downs of signalling between root and shoot 413

Meetings

Air pollution: forest health and passive sampling 417

REVIEW

Tansley Reviews Nos. 115 and 116

Impact of ozone on the reproductive development of plants
V. J. Black, C. R. Black, J. A. Roberts and C. A. Stewart 421

Cyanobacterium–plant symbioses
A. N. Rai, E. Söderbäck and B. Bergman 449

Books

Plant secondary metabolism 483

RESEARCH

The DL gene system in common bean: a possible mechanism for control of root–shoot partitioning
M. A. Hannah, M. J. Iqbal and F. E. Sanders ■ **Commentary p. 413** ■ 487

The role of oxygen in submergence-induced petiole elongation in *Rumex palustris*: *in situ* measurements of oxygen in petioles of intact plants using micro-electrodes
J. G. H. M. Rijnders, W. Armstrong, M. J. Darwent, C. W. P. M. Blom and L. A. C. J. Voesenek 497

Ancestry of plant MADS-box genes revealed by bryophyte (*Physcomitrella patens*) homologues
N. T. Krogan and N. W. Ashton 505

What are the effects of nitrogen deficiency on growth components of lettuce?
M. R. Broadley, A. J. Escobar-Gutiérrez, A. Burns and I. G. Burns 519

Nitrogen fertilization reduces *Sphagnum* production in bog communities
U. Gunnarsson and H. Rydin 527

NH_3 and NO_2 fluxes between beech trees and the atmosphere – correlation with climatic and physiological parameters
A. Geiler, M. Rienks and H. Rennenberg 539

Does elevated ozone have differing effects in flowering and deblossomed strawberry?
P. D. Drogoudi and M. R. Ashmore 561

Differences in nitrogen metabolism of *Faidherbia albida* and other N_2-fixing tropical woody acacias reflect habitat water availability
C. Campa, D. Diouf, I. Ndoye and B. Dreyfus 571

Severe photobiont injuries of lichens are strongly associated with air pollution
S. Tarhanen, J. Poikolainen, T. Holopainen and J. Oksanen 579

Bioaccumulation of lead by the lichen *Acarospora smaragdula* from smelter emissions
O. W. Purvis, B. J. Williamson, K. Bartok and N. Zoltani 591

Ecophysiological differences among *Leymus mollis* populations across a subarctic dune system caused by environmental, not genetic, factors
E. Imbert and G. Houle 601

Symptomless infection of banana and maize by endophytic fungi impairs photosynthetic efficiency
L. S. R. C. Pinto, J. L. Azevedo, J. O. Pereira, M. L. C. Vieira and C. A. Labate 609

Identification of endophytic fungi from *Livistona chinensis* based on morphology and rDNA sequences
L. D. Guo, K. D. Hyde and E. C. Y. Liew 617

Transmembrane electric potential difference of germ tubes of arbuscular mycorrhizal fungi responds to external stimuli
S. M. Ayling, S. E. Smith and F. A. Smith 631
